

DESCRIPTION:

Metz Non-Flammable Cleaner is a specially formulated blend of solvents which is non-flammable, non VOC and is not classed as Dangerous Goods for transport. It is designed to clean uncured Metz compounds from tile or brick surfaces, tools, mixing equipment, etc.

FEATURES AND BENEFITS:

- Non-flammable
- Non VOC according to EU regulations
- Very low irritation to skin and eyes. Non sensitising.
- Readily biodegradeable
- Not classed as Dangerous Goods for transport
- Quality Accreditation. The management system governing the development and manufacture of this product is proudly ISO9001:2015 certified.

RECOMMENDED:

Used for cleaning the following Metz products:

- i) Metz Epoxies - 4HB, 4HB-EN, 5EN, 5NF, 5NFA, 6B, 6M, 10, 10EN, 20E, 33 series, 33EN series and 44-SL.
- ii) Metz Vinyl Ester - 10VE, 14VE, 15VE
- iii) Metz Polyurethanes - 20B, 20P, 92, 93PU series, 94 series
- iv) Metz Furanes - 12P, 12PHF, 12P/2
- v) Metz Viton® - Viton® products

Note: Special cleaners can be supplied for other compounds on request. Consult Metz for advice regarding removal of cured Metz cements and compounds.

NOT RECOMMENDED:

- For degreasing surfaces prior to applying coatings
- For contact with acrylic waterproof membranes

INSTRUCTIONS FOR USE:

- a) The cleaner is only effective on uncured cements. Clean up must take place before the Metz cements begin to set (refer to individual Metz Data Sheets).
- b) Use only minimum amount of cleaner to clean tile/brick surfaces. Avoid excessive use of cleaner on tile/brick joints as this will adversely affect jointing cement. Wipe surfaces with clean, absorbent cloth, dampened with appropriate Metz Cleaner.
- c) Remove any excess cleaner. Do not allow to pool on surfaces.
- d) Provide adequate ventilation.
- e) Do not use Metz cleaners for cleaning hands etc. Use soap and water only or special cleaning compounds.

Please refer to Safety Data Sheets for full safety precautions.
