COMPETITION SWIMMING POOLS

Metz Swimming Pool tiles are produced in a modular format:

250 x 125mm
(nett size 244 x 119mm)

This format facilitates precision placement to required FINA competition dimensions, using full piece tiles.

FITNESS, CLUBS AND SCHOOLS

A swimming pool is a major investment that needs to be constructed carefully with quality materials.

Metz Swimming Pool tiles have stood the test of time and provide many years of premium service for these facilities.

Aura by Livewell, SA
Courtesy of Hydrilla

HYDROTHERAPY POOLS

Hydrotherapy pools have special requirements under Australian Standards as specified in AS 3979:2006

Hydrotherapy pools:

- slip resistant floor finishes in light colours with colour contrast edge nosings

SWIM SCHOOLS

Learn to swim pools require safety and durability. Metz tiles provide the most durable finish with minimal maintenance.

Lost time and empty pools to carry out repairs or re-application of other finishes is not only expensive, but produces a significant risk of clients going elsewhere.

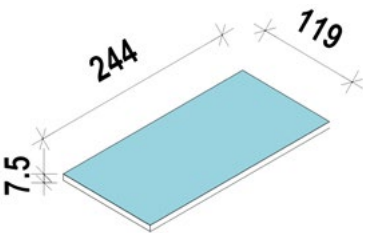

LEISURE AND FUN

Metz Swimming Pool tile range offers all the essentials to provide a safe and fun environment for:

- Toddler pools
- Water play areas
- Leisure pools
- Splash pads

Metz Swimming Pool tiles are available in 4 standard colours, 6 intense colours and 38 general colours.

STANDARD FORMAT

1200 - MODULAR FORMAT 250 x 125mm (nett size 244 x 119mm)

OTHER POOL EDGE SYSTEMS

WEISBADEN high water level pool edge system combines the handhold, overflow edge and channel into one shaped ceramic piece.

The water level is approximately 30mm above the pool surrounds, making it easier for swimmers to exit the pool.

Pimpama Sports Hub, QLD
Photographer: Christopher Frederick Jones

CONCOURSES AND SURROUNDS

Swimming pool surrounds require the highest level of slip resistance. Excited children and distracted adults require secure footing for the critical barefoot areas.

Metz only recommend tiles that achieve P5 and wet barefoot "C" rated tiles for these applications.

Our experience is that many facilities have been dissatisfied with the performance of their "B" rated tiles, which are the ***minimum*** recommendation of the Standards Australia Slip Resistance Handbooks HB197 and HB198.

CONCOURSE AND SURROUNDS OPTIONS

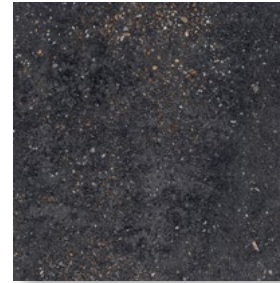

MicroGRIP® is a high performance slip resistant finish, ideal for demanding areas like swimming pool surrounds and concourses.

The flat, mild textured surface of the MicroGRIP® finish provides the ideal balance between long term sustainable slip resistance and ease of cleaning.

MicroGRIP® / P5 / C

STRADALE CLAY

STRADALE CHARCOAL

STRADALE DARK

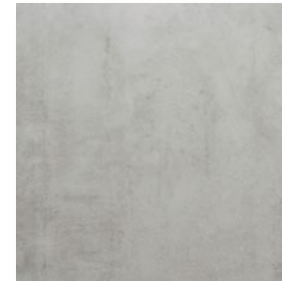

STRADALE SILVER

TIMELESS BEIGE

TIMELESS DARK GREY

TIMELESS LIGHT GREY

TIMELESS TREND

MISCELA GREIGE

VORTICE LAVA

VORTICE ROCK

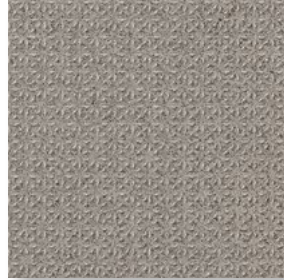

VORTICE SNOW

Most Metz porcelain tile ranges can be produced in the MicroGRIP® surface, however minimum quantities may apply for items other than shown here or on our other architectural tile brochures.

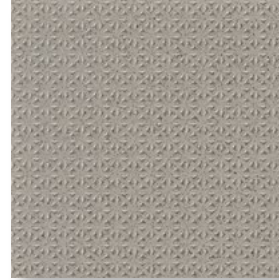

CONCOURSE AND SURROUNDS OPTIONS

Where there is a preference for profiled surface tiles, Metz can offer the traditional 'star' profiled tiles.

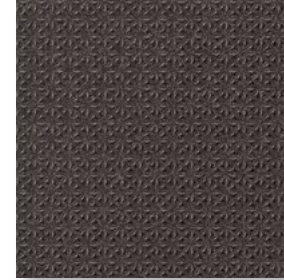

STAR / R12 / V4 / C

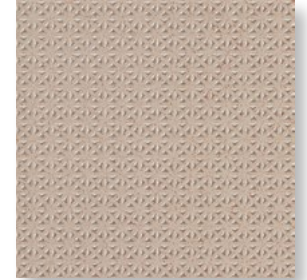

STAR CANAZEI

STAR CEFALU

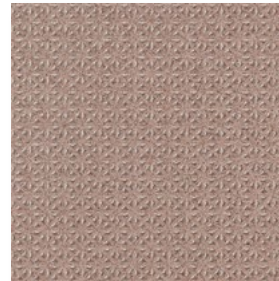

STAR ELBA

STAR GARDA

STAR POMPEI

STAR TAORMI

STAR CORTINA

COVES, INTERNAL & EXTERNAL PILLARS

Coves, internal & external pillars can be supplied for all Star tiles.
Cove tiles are produced in a smooth finish.

CHANGE ROOMS

The surrounds of a commercial swimming pool area have to safely and hygienically allow the movement of patrons into the facility, from the change rooms and around constantly wet surfaces. The flooring must be easily kept clean and its appearance must be attractive. Shower areas, steps and ramps require enhanced slip resistance values.

CHANGE ROOMS OPTIONS

METZ SPETTRO series features modular coordination and a huge range of colours. Quality porcelain tiles in mix and match formats and colours. Spettro is available in two glazed wall finishes - matt and gloss - as well as unglazed full body porcelain for both wall and floor applications.

SPETTRO MATT

SLIP RESISTANCE // WALL TILE ONLY

Matt tiles provide a luxury matt glazed finish, suitable for wall applications only.

SPETTRO GLOSS

SLIP RESISTANCE // WALL TILE ONLY

Gloss tiles provide a luxury gloss glazed finish, suitable for wall applications only.

SPETTRO UNGLAZED FULL BODY

SLIP RESISTANCE // MEDIUM / P3* or P4*

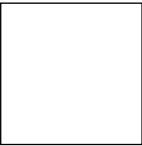

Unglazed full body tiles provide a natural P3* or P4* finish that is suitable for walls, and for floor applications that are 'occasionally wet' such as change rooms that are mainly dry, internal lobbies or access areas.

*Slip rating may vary from colour to colour. Contact Metz for specific results

Spettro tiles are porcelain body, meaning that installation within the pool is possible, however, are primarily offered for walls outside the pool itself. Where mesh mounted mosaics are used inside the pool tank, epoxy adhesive must be used. Contact Metz for further information.

WALL & FLOOR TILE OPTIONS - SPETTRO

Spettro's modular sizing allows for endless laying patterns and complete design freedom.

WALL & FLOOR TILE OPTIONS - SPETTRO UNGLAZED

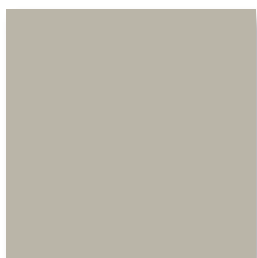

Spettro unglazed full body porcelain tiles provide a natural **P3* / P4* finish** that is suitable for walls, and for floor applications that are 'occasionally wet' such as change rooms that are mainly dry, internal lobbies or access areas.

METZ FIXING MATERIALS

Metz offer a range of installation materials manufactured in our quality accredited facility in Clayton, VIC.

All products are made to Australian standards, for the Australian market.

Our complete, tailored pool specification is available upon request.

Products:

METZ 17M

Water washable epoxy adhesive for mosaic tiles

METZ PR1

One-part cement based render

METZ 4HB-EN

Epoxy novolac corrosion resistant coating

METZ 9HB

High-build epoxy coating

METZ 11C

Cementitious grout

METZ 11E

Water washable epoxy grout

METZ 27

Premium ceramic tile adhesive

METZ 27M

Flexible cementitious membrane

METZ 27SR

Sulphate resisting ceramic tile adhesive

METZ ANTISLIP ADDITIVE

Thermoplastic polymer powder

INSTALLATION

Purpose made, high strength two-part adhesives such as Metz 27 (C2TES2 type) are recommended.

Tiles must be installed in accordance with Australian Standard AS 3958.1:2007 refer appendix E - Wet conditions (continuously immersed). Particular attention to be paid to paragraph E2.6 noting that "the tiles should be solidly bedded so that voids are eliminated beneath them as far as possible".

Metz recommends the following methods to ensure minimal voids are present in the adhesive.

- back buttering each tile and then;
- systematically placing tiles onto notched adhesive ribs and;
- immediately working the tile back and forth across the ribs by 10 to 15mm

Voids underneath swimming pool tiles are believed to be a major cause of adhesion failure where the voids can interconnect.

Where tiles are not worked into adhesive ribs, these ribbed voids provide the perfect interconnection for water flow underneath the tile, leading to failure.

TECHNICAL INFORMATION

Metz recommend higher slip resistance than the current Standards Australia slip resistance handbook minimums of a "B wet barefoot" rated tile. It is often poorly understood that the recommendations in these handbooks are in fact minimums, and that the handbooks strongly advise designers to consider many factors in their designs such as maintenance, contamination, the nature of users (age, gait, crowding), slope, lighting and footwear (or lack of).

The latest Slip Resistance Handbook (HB198) and latest revision of AS 4586:2013 also make significant note on the effects of wear on slip resistance. It is widely recognised that slip resistance on all surfaces declines from wear over time. Many surface types are particularly susceptible to loss of slip resistance, following what would appear to be a relatively minimal amount of initial wear.

Accelerated Wear Test (AWT) methods are designed to enable specifiers to determine if a product is susceptible to rapid and significant decline in slip resistance. The result from 500 wear (scrub) cycles is excellent at predicting poorly performing products that otherwise seem suitable when brand new. Results from 5,000 wear (scrub) cycles provide prediction of results after long term use.

Accelerated wear testing is only used in conjunction with wet pendulum testing. For this reason all Metz recommended concourse tiles achieve P5 ratings on the pendulum test and C ratings on the wet barefoot ramp test.

Metz strongly recommend both Barefoot C / Wet Pendulum P5 rated tiles for the following areas:

- Pool floors water depth <1.5m
- Pool edges
- Raised hobs
- Lap pool turning walls
- Steps and stairs
- Underwater seats and ledges
- Pool concourses and surrounds
- Shower areas

For locations that are only 'occasionally wet' tiles with a P4 rating may offer sufficient slip resistance for:

- Internal entries/lobbies
- Change rooms
- Amenities

Poor selection can result in a long term problem that is expensive to rectify and leaves operators vulnerable to claims following a slip incident.
