

Corporate Profile

For over 70 years the Metz Group has manufactured, supplied and installed specialty construction products

The brands you trust, trust Metz...

COMPANY OVERVIEW

Metz was founded in Melbourne on the 25th of June 1953 and has since that time been a manufacturer and supplier of specialist building materials. Our core products in 1953 were acid and abrasive resistant materials.

Today acid resistance remains a key niche area, however, the business has diversified to include many other specialty areas. The ceramic tile division imports quality European tiles for commercial kitchens, community aquatic centres and multiple commercial and residential projects. Our facades division focuses on ceramic facades, Building Integrated Photovaltaics (BiPV), GRC and Aluminium solutions.

Metz remains a proudly Australian owned company headquartered in Sydney. Our Quality Accredited Manufacturing plant is located in Melbourne, our tile divisions distribution centre and our Head Office are in Sydney.

The ability to supply, and where required, install our materials makes the Metz offering in Australia unique. Metz exports our specialty materials throughout Asia, the Pacific and to the Middle East.

METZ GROUP CAPABILITES

Specialty Ceramic Tiles

Metz import and distribute specialty European made ceramic tiles for demanding environments including aquatic centres, commercial kitchens and high traffic public access areas where durability and slip resistance are paramount.

Specialty Facade Systems

Metz offer premium facade products that enable modern and innovative designs that transform into durable, sustainable, and eco-friendly building exteriors fused with style and performance.

Specialty Construction Materials

Metz manufacture a comprehensive range of specialist construction materials including high performance coatings, protective linings, industrial toppings and ceramic systems, providing long term performance in critical applications.

Professional Installation Services

Metz provides nationwide professional installation backed by in-house experts, ensuring high performance materials are supplied and installed seamlessly under a single point of responsibility.

WHY METZ?

What sets us apart

70+ years experience

We have a proven track record in delivering for clients in critical applications

Technical Expertise

In-house specialists support the material section and installation process of your project

Quality Manufacturing

Local Australian manufacture backed by ISO9001 accreditation governing the development and manufacture of products

Long Term Performance

Our complete systems are engineered for long term durability and performance

Single Point of Responsibility

Supply and installation in house is available for most systems offered by Metz

SPECIALTY CERAMIC TILES

Metz Specialty Ceramic Tiles is the ceramic tile division of the Metz Group whose focus is importing and distributing quality European ceramic tiles across Australia. This division has showrooms in Melbourne, Brisbane & Sydney.

The tile division supplies specialist ceramic tiles for commercial kitchen flooring, aquatic centres and a broad range of slip resistant tiles suitable for many commercial applications, as well as beautiful, aesthetic and practical ceramic tiles.

Commercial Kitchens

A busy commercial kitchen is one of the most demanding work environments. Metz has a comprehensive range of non slip tiles and accompanying fixing materials, providing long term safety, hygiene and durability.

Aquatic Centres

Metz is the Australian market leader in the specialised tiling systems for commercial swimming pools and aquatic centres. Metz establish the benchmark for long term performance by supply of fit for purpose complete tile and fixing material systems.

Some examples of where to use Metz products for Aquatic Centre projects

- Pool tiling systems
- Gutter linings
- Balance Tanks linings
- Concourses & pool surrounds
- Plant rooms
- Chemical storage areas
- Steps & ramp entries

Ceramic & Slip Resistant Tiles

Metz Specialty Ceramic Tiles provide excellent slip resistance, durability and easy maintenance while also offering a range of styles to suit any design aesthetic.

Metz signature MicroGRIP®, NanoGRIP® and Sicura finishes are the ideal choice for:

- Amenities
- Aged Care & Hospitals
- Transport Infrastructure
- Shopping Centres & Retail
- Concourses and high traffic areas
- External building entries
- External ramps
- Tactile Ground Surface Indicators

SPECIALTY FACADE SYSTEMS

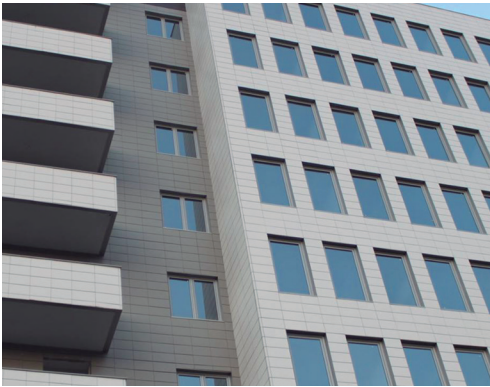

Metz facade systems provide architects and developers with innovative systems that combine sustainability, performance and visual impact.

Ceramic Facades & Cladding

Metz Presto and Presto+ extruded cladding profiles offer an eco-friendly, recyclable, and low maintenance solutions for ventilated facade applications.

Adaptable and simple installation systems, combined with customisable tile colours, shapes, sizes, profiles and unique glaze options offer an aesthetic design choice.

CERTIFIED
NON-COMBUSTIBLE
CSIRO TESTED TO AS1530.1

Building Integrated Photovoltaics (BiPV)

Introducing fully customisable Photovoltaic Glass that offers energy generation and carbon savings without sacrificing aesthetics.

Onyx Solar is the world's leading manufacturer of transparent photovoltaic (PV) glass for buildings.

Aesthetic Photovoltaic Solutions for buildings that generate their own power

Crystalline Silicon (c-Si)

- Mono Crystalline
- Poly Crystalline
- Solid Colours for Cladding - White, Corten Steel, Terracotta, Blue etc.
- Walkable floor panels
- Acid etch finishes

Amorphous Silicon (a-Si)

- Translucencies - Dark, Low, Medium, High
- Skylights
- Facades
- Double glazing
- Colours

SPECIALTY CONSTRUCTION MATERIALS

Metz Specialty Construction Materials is the materials division of the Metz Group, supplying high performance systems for critical industrial applications. Our core expertise spans acid protection, industrial flooring, and pool & kitchen tile fixing systems, supported by a broad range of products used in concrete remediation, wastewater treatment, and carbon reinforcement solutions.

When paired with our professional installation service, Metz delivers long term, fully integrated solutions backed by a single point of responsibility warranty — giving clients confidence, durability, and accountability on every project.

Acid Protection

A complete range of acid protection solutions are offered including acid bricks, tiles and a wide variety of coatings.

Some examples of where to use Metz materials for Acid Protection

- Oil & metal refineries
- Chemical plants
- Power stations
- Wastewater network
- Explosives facilities
- Fertiliser plants

Carbon Strengthening

Carbon is the best solution for the effective repair and reinforcement of any type of structure.

Some examples of where to use Metz materials for carbon strengthening

- Slab & beam strengthening
- Bridge decks, beams
- Post fitting to slab openings
- Box culverts
- Walls, chimneys
- Timber & steel structures

Industrial Flooring

Metz has a large selection of Industrial floor solutions for the harshest physical and chemical environments.

Some examples of where to use Metz materials for Industrial Flooring

- Food factories
- Breweries
- Bottling plants
- Glass manufacturing
- Plant rooms
- Workshop flooring

PROFESSIONAL INSTALLATION SERVICES

Metz Professional Installation Services division provides a fully integrated national installation service, supported by our in house technical specialists. By combining material supply and installation under one accountable provider, we ensure every system performs exactly as designed.

Metz stands apart in the industry: we are one of the few companies capable of installing every product we manufacture or import. This capability allows us to offer a genuine supply and install warranty, or to deliver unparalleled technical support to third party installers—guided by experts who have applied our systems extensively in the field. Our teams possess firsthand knowledge of how Metz materials perform in demanding, real world environments across Australia and abroad. From routine maintenance to complex, large scale installations, the Metz Project Services team delivers proven expertise and dependable results.

Coatings

A broad range of coatings for any specialised application.

Some examples of where to use Metz materials for coating.

- Industrial flooring
- Commercial kitchens
- Containment bunds
- Balance tanks
- Drainage pits

 **QUEENSLAND BUILDING AND CONSTRUCTION COMMISSION**
License No. 1182463

NSW Builders
License No. 261105C

Waterproofing

As part of your coating or tiling project Metz can install compatible, fit for purpose waterproofing beneath the wearing surface.

Some examples of where to use Metz materials for tiling.

- Balconies
 - Commercial kitchens
- Swimming pools
 - Balance tanks
- Containment bunds
 - Bathrooms/public amenities

Tiling

Single point of responsibility supply and installation service.

Some examples of where to use Metz materials for tiling.

- Food and beverage
- Aquatic centres
- Industrial flooring
- Acid protection
- Corrosive environments

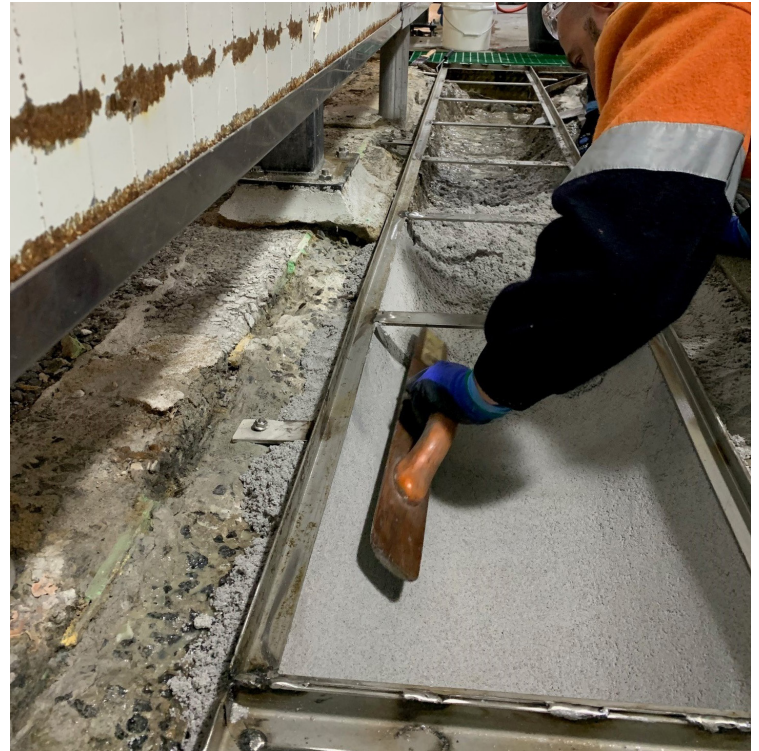

Case Study

The drain & surrounding floor areas at this food production facility were heavily corroded and in need of urgent repair. A saw cut was made on each side of the drain and all damaged concrete was removed. Area was then cleaned and prepared.

New drain frames were then installed and repair action comprised:

- One coat of Metz Epoxy Primer to all areas.
- Backfilled large cavities in the existing concrete with Metz 10 epoxy concrete.
- Installed Metz 33-VG epoxy render to create the original curvature of the drain.
- Install Metz 33-TG epoxy topping to the surrounding floor areas above the drain incorporating a slip-resistant finish.
- Apply 4HB-EN epoxy novolac grey seal coat to all areas.

OUR TEAM ARE READY TO HELP

Metz has the solution whether you're designing an aquatic centre, upgrading industrial infrastructure, specifying innovative facade systems, or requiring slip resistant ceramic tiles.
